

Location: Hlohovec  
Contract Value: -  
Completion: 11/2017

The primary objective of our project was to divide the facilities of the Faurecia and Plastic Omnium production plant in Hlohovec. Along with this, we also constructed a two-story office building and warehouse, and carried out necessary renovations to existing premises on site. In the exterior area of the plant, we installed new networks, reconstructed service roads, and built parking areas to enhance the overall functionality of the facility.
